EXCLUSIVE CUSTOM

A drum kit perfectly made to bring you sheer joy! **RMV** can make your dreams become a reality.

RMV Exclusive Custom drums are now made-to-order according to your needs and specifications.

Choose the wood type for the unique sound you are looking for and be amazed with the results! From shell thickness and finishes to the overall drum kit configuration, everything is made by our skillful artisans and inspected by our master craftsman, Mr. Daniel Giardino, for the highest quality control.

Exclusive Custom drums are produced with selected sheets of Brazilian exotic wood. The Bapeva wood, known as Brazilian maple, has been traditionally used by **RMV** to produce fine instruments. The Purple Heart wood is used to produce exquisite and unique drum kits that look and sound great! And, for traditional tastes, imported maple wood can be blended with Brazilian wood creating unique and harmonious sounds. As a final refining touch, an outer layer of Copaiba wood can be added to create a matchless visual effect. If a see-through lacquer finish is ordered, colored or not, the natural wood grains will show through for an astonishing look.

Every single piece of wood used on an **RMV Exclusive Custom** drum is hand-picked to ensure that the shell will be fully resonant and flawless.

Since **RMV** is one of the few companies around the world that produces its own ply wood for musical instrument manufacturing, there is total control over the entire process during the production of the drum shells. This is the genesis of exclusivity.

Bring your emotions to life. Enjoy your music.

RMV Exclusive Custom drums. Play with passion.

CONCEPT XR5-S

A drum kit with thicker shells (6-ply – 6.9 mm) made for musicians with attitude.

Made of Brazilian Bapeva wood and an outer ply of Copaiba wood, the **RMV Concept XR5-s** series is perfect for anyone who is looking for great volume and projection, plus a full-bodied, focused and controlled sound.

The use of our 2.5 mm **Sturdy Hoops** on the snare drum brings you both sound projection and great rim shots!

Along with the regular color lacquer finishing options, the new sparkle finishes will appeal to drummers of all ages. With a modern and elegant look, they are perfect instruments to shine on stage and add personality to your playing style.

Though the main characteristic of this drum kit is power, dynamic control finds its place thanks to our sensitive 1.6 mm classic hoops on the tom-toms and floor toms.

Enjoy the beauty of the perfect sound produced by perfect bearing edges. You will experience the precision of every stroke and the articulation of every sound no matter how fast or loud you play.

Play the new **Concept XR5-s** drums: Power and elegance – for both the drummer and the drums!

CONCEPT XR7

Great drummers are known by their technique, sound, expression and good taste - but it all begins with the choice of the right instrument.

The new **RMV Concept XR7** series allows you to express yourself as a musician with total freedom and accuracy. No matter what music style you play, the **Concept XR7** drums will always give you back just the right response. From the softest touch to the most explosive stroke, the 4-ply 4.6 mm shells will sound like an extension of your own voice.

The snare drum is equipped with our durable 2.5 mm **Sturdy Hoops**. With crisp sounds and rich harmonics, the snare drum can sound either controlled or wild, depending on how you tune it.

The **Concept XR7** is one of the most versatile drum kits that you can ever play. From jazz to rock and roll, from samba to pop music, everything fits perfectly well.

Just like the Concept XR5-s, you can choose between regular colors and the new sparkle finishes.

No matter what the situation is, the **Concept XR7** fulfills the assignment!
